

firms in this category, total, that operated for the entire year.<sup>93</sup> Of this total, 965 firms had employment of 999 or fewer employees, and an additional 12 firms had employment of 1,000 employees or more.<sup>94</sup> Thus, under this second category and size standard, the majority of firms can, again, be considered small. Assuming this general ratio continues in the context of Phase I 220 MHz licensees, the Commission estimates that nearly all such licensees are small businesses under the SBA's small business size standard. In addition, limited preliminary census data for 2002 indicate that the total number of cellular and other wireless telecommunications carriers increased approximately 321 percent from 1997 to 2002.<sup>95</sup>

35. *220 MHz Radio Service – Phase II Licensees.* The 220 MHz service has both Phase I and Phase II licenses. The Phase II 220 MHz service is a new service, and is subject to spectrum auctions. In the 220 MHz Third Report and Order, we adopted a small business size standard for “small” and “very small” businesses for purposes of determining their eligibility for special provisions such as bidding credits and installment payments.<sup>96</sup> This small business size standard indicates that a “small business” is an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$15 million for the preceding three years.<sup>97</sup> A “very small business” is an entity that, together with its affiliates and controlling principals, has average gross revenues that do not exceed \$3 million for the preceding three years. The SBA has approved these small business size standards.<sup>98</sup> Auctions of Phase II licenses commenced on September 15, 1998, and closed on October 22, 1998.<sup>99</sup> In the first auction, 908 licenses were auctioned in three different-sized geographic areas: three nationwide licenses, 30 Regional Economic Area Group (EAG) Licenses, and 875 Economic Area (EA) Licenses. Of the 908 licenses auctioned, 693 were sold.<sup>100</sup> Thirty-nine small businesses won licenses in the first 220 MHz auction. The second auction included 225 licenses: 216 EA licenses and 9 EAG licenses. Fourteen companies claiming small business status won 158 licenses.<sup>101</sup>

36. *800 MHz and 900 MHz Specialized Mobile Radio Licenses.* The Commission awards “small entity” and “very small entity” bidding credits in auctions for Specialized Mobile Radio (SMR) geographic area licenses in the 800 MHz and 900 MHz bands to firms that had revenues of no more than

<sup>93</sup> U.S. Census Bureau, 1997 Economic Census, Subject Series: “Information,” Table 5, Employment Size of Firms Subject to Federal Income Tax: 1997, NAICS code 513322 (issued October 2000).

<sup>94</sup> *Id.* The census data do not provide a more precise estimate of the number of firms that have employment of 1,500 or fewer employees; the largest category provided is “Firms with 1000 employees or more.”

<sup>95</sup> See U.S. Census Bureau, 2002 Economic Census, Industry Series: “Information,” Table 2, Comparative Statistics for the United States (1997 NAICS Basis): 2002 and 1997, NAICS code 513322 (issued Nov. 2004). The preliminary data indicate that the total number of “establishments” increased from 2,959 to 9,511. In this context, the number of establishments is a less helpful indicator of small business prevalence than is the number of “firms,” because the latter number takes into account the concept of common ownership or control. The more helpful 2002 census data on firms, including employment and receipts numbers, will be issued in late 2005.

<sup>96</sup> 220 MHz Third Report and Order, 12 FCC Rcd 10943, 11068-70, paras. 291-295 (1997).

<sup>97</sup> *Id.* at 11068, para. 291.

<sup>99</sup> See generally Public Notice, “220 MHz Service Auction Closes,” 14 FCC Rcd 605 (1998).

<sup>100</sup> See, e.g., Public Notice, “FCC Announces It is Prepared to Grant 654 Phase II 220 MHz Licenses After Final Payment is Made,” 14 FCC Rcd 1085 (1999).

<sup>101</sup> Public Notice, “Phase II 220 MHz Service Spectrum Auction Closes,” 14 FCC Rcd 11218 (1999).

\$15 million in each of the three previous calendar years, or that had revenues of no more than \$3 million in each of the previous calendar years, respectively.<sup>102</sup> These bidding credits apply to SMR providers in the 800 MHz and 900 MHz bands that either hold geographic area licenses or have obtained extended implementation authorizations. The Commission does not know how many firms provide 800 MHz or 900 MHz geographic area SMR service pursuant to extended implementation authorizations, nor how many of these providers have annual revenues of no more than \$15 million. One firm has over \$15 million in revenues. The Commission assumes, for purposes here, that all of the remaining existing extended implementation authorizations are held by small entities, as that term is defined by the SBA. The Commission has held auctions for geographic area licenses in the 800 MHz and 900 MHz SMR bands. There were 60 winning bidders that qualified as small or very small entities in the 900 MHz SMR auctions. Of the 1,020 licenses won in the 900 MHz auction, bidders qualifying as small or very small entities won 263 licenses. In the 800 MHz auction, 38 of the 524 licenses won were won by small and very small entities.

37. *700 MHz Guard Band Licensees.* In the *700 MHz Guard Band Order*, we adopted a small business size standard for “small businesses” and “very small businesses” for purposes of determining their eligibility for special provisions such as bidding credits and installment payments.<sup>103</sup> A “small business” as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$15 million for the preceding three years. Additionally, a “very small business” is an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than \$3 million for the preceding three years. An auction of 52 Major Economic Area (MEA) licenses commenced on September 6, 2000, and closed on September 21, 2000.<sup>104</sup> Of the 104 licenses auctioned, 96 licenses were sold to nine bidders. Five of these bidders were small businesses that won a total of 26 licenses. A second auction of 700 MHz Guard Band licenses commenced on February 13, 2001 and closed on February 21, 2001. All eight of the licenses auctioned were sold to three bidders. One of these bidders was a small business that won a total of two licenses.<sup>105</sup>

38. *Rural Radiotelephone Service.* The Commission has not adopted a size standard for small businesses specific to the Rural Radiotelephone Service.<sup>106</sup> A significant subset of the Rural Radiotelephone Service is the Basic Exchange Telephone Radio System (BETRS).<sup>107</sup> The Commission uses the SBA’s small business size standard applicable to “Cellular and Other Wireless Telecommunications,” *i.e.*, an entity employing no more than 1,500 persons.<sup>108</sup> There are approximately 1,000 licensees in the Rural Radiotelephone Service, and the Commission estimates that there are 1,000 or fewer small entity licensees in the Rural Radiotelephone Service that may be affected by the rules and policies adopted herein.

<sup>102</sup> 47 C.F.R. § 90.814(b)(1).

<sup>103</sup> See *Service Rules for the 746-764 MHz Bands, and Revisions to part 27 of the Commission’s Rules*, WT Docket No. 99-168, Second Report and Order, 65 FR 17599 (Apr. 4, 2000).

<sup>104</sup> See generally Public Notice, “220 MHz Service Auction Closes,” Report No. WT 98-36 (Oct. 23, 1998).

<sup>105</sup> Public Notice, “700 MHz Guard Band Auction Closes,” DA 01-478 (rel. Feb. 22, 2001).

<sup>106</sup> The service is defined in section 22.99 of the Commission’s Rules, 47 C.F.R. § 22.99.

<sup>107</sup> BETRS is defined in sections 22.757 and 22.759 of the Commission’s Rules, 47 C.F.R. §§ 22.757 and 22.759.

<sup>108</sup> 13 C.F.R. § 121.201, NAICS code 517212.

39. *Air-Ground Radiotelephone Service.* The Commission has not adopted a small business size standard specific to the Air-Ground Radiotelephone Service.<sup>109</sup> We will use SBA's small business size standard applicable to "Cellular and Other Wireless Telecommunications," *i.e.*, an entity employing no more than 1,500 persons.<sup>110</sup> There are approximately 100 licensees in the Air-Ground Radiotelephone Service, and we estimate that almost all of them qualify as small under the SBA small business size standard.

40. *Aviation and Marine Radio Services.* Small businesses in the aviation and marine radio services use a very high frequency (VHF) marine or aircraft radio and, as appropriate, an emergency position-indicating radio beacon (and/or radar) or an emergency locator transmitter. The Commission has not developed a small business size standard specifically applicable to these small businesses. For purposes of this analysis, the Commission uses the SBA small business size standard for the category "Cellular and Other Telecommunications," which is 1,500 or fewer employees.<sup>111</sup> Most applicants for recreational licenses are individuals. Approximately 581,000 ship station licensees and 131,000 aircraft station licensees operate domestically and are not subject to the radio carriage requirements of any statute or treaty. For purposes of our evaluations in this analysis, we estimate that there are up to approximately 712,000 licensees that are small businesses (or individuals) under the SBA standard. In addition, between December 3, 1998 and December 14, 1998, the Commission held an auction of 42 VHF Public Coast licenses in the 157.1875-157.4500 MHz (ship transmit) and 161.775-162.0125 MHz (coast transmit) bands. For purposes of the auction, the Commission defined a "small" business as an entity that, together with controlling interests and affiliates, has average gross revenues for the preceding three years not to exceed \$15 million dollars. In addition, a "very small" business is one that, together with controlling interests and affiliates, has average gross revenues for the preceding three years not to exceed \$3 million dollars.<sup>112</sup> There are approximately 10,672 licensees in the Marine Coast Service, and the Commission estimates that almost all of them qualify as "small" businesses under the above special small business size standards.

41. *Fixed Microwave Services.* Fixed microwave services include common carrier,<sup>113</sup> private operational-fixed,<sup>114</sup> and broadcast auxiliary radio services.<sup>115</sup> At present, there are approximately 22,015 common carrier fixed licensees and 61,670 private operational-fixed licensees and broadcast auxiliary

<sup>109</sup> The service is defined in section 22.99 of the Commission's Rules, 47 C.F.R. § 22.99.

<sup>110</sup> 13 C.F.R. § 121.201, NAICS codes 517212.

<sup>111</sup> 13 C.F.R. § 121.201, NAICS code 513322 (changed to 517212 in October 2002).

<sup>112</sup> *Amendment of the Commission's Rules Concerning Maritime Communications*, PR Docket No. 92-257, Third Report and Order and Memorandum Opinion and Order, 13 FCC Rcd 19853 (1998).

<sup>113</sup> See 47 C.F.R. §§ 101 *et seq.* (formerly, Part 21 of the Commission's Rules) for common carrier fixed microwave services (except Multipoint Distribution Service).

<sup>114</sup> Persons eligible under parts 80 and 90 of the Commission's Rules can use Private Operational-Fixed Microwave services. See 47 C.F.R. Parts 80 and 90. Stations in this service are called operational-fixed to distinguish them from common carrier and public fixed stations. Only the licensee may use the operational-fixed station, and only for communications related to the licensee's commercial, industrial, or safety operations.

<sup>115</sup> Auxiliary Microwave Service is governed by Part 74 of Title 47 of the Commission's rules. See 47 C.F.R. Part 74. This service is available to licensees of broadcast stations and to broadcast and cable network entities. Broadcast auxiliary microwave stations are used for relaying broadcast television signals from the studio to the transmitter, or between two points such as a main studio and an auxiliary studio. The service also includes mobile television pickups, which relay signals from a remote location back to the studio.

radio licensees in the microwave services. The Commission has not created a size standard for a small business specifically with respect to fixed microwave services. For purposes of this analysis, the Commission uses the SBA small business size standard for the category "Cellular and Other Telecommunications," which is 1,500 or fewer employees.<sup>116</sup> The Commission does not have data specifying the number of these licensees that have more than 1,500 employees, and thus is unable at this time to estimate with greater precision the number of fixed microwave service licensees that would qualify as small business concerns under the SBA's small business size standard. Consequently, the Commission estimates that there are up to 22,015 common carrier fixed licensees and up to 61,670 private operational-fixed licensees and broadcast auxiliary radio licensees in the microwave services that may be small and may be affected by the rules and policies adopted herein. We noted, however, that the common carrier microwave fixed licensee category includes some large entities.

42. *Offshore Radiotelephone Service.* This service operates on several UHF television broadcast channels that are not used for television broadcasting in the coastal areas of states bordering the Gulf of Mexico.<sup>117</sup> There are presently approximately 55 licensees in this service. We are unable to estimate at this time the number of licensees that would qualify as small under the SBA's small business size standard for "Cellular and Other Wireless Telecommunications" services.<sup>118</sup> Under that SBA small business size standard, a business is small if it has 1,500 or fewer employees.<sup>119</sup>

43. *39 GHz Service.* The Commission created a special small business size standard for 39 GHz licenses – an entity that has average gross revenues of \$40 million or less in the three previous calendar years.<sup>120</sup> An additional size standard for "very small business" is: an entity that, together with affiliates, has average gross revenues of not more than \$15 million for the preceding three calendar years.<sup>121</sup> The SBA has approved these small business size standards.<sup>122</sup> The auction of the 2,173 39 GHz licenses began on April 12, 2000 and closed on May 8, 2000. The 18 bidders who claimed small business status won 849 licenses. Consequently, the Commission estimates that 18 or fewer 39 GHz licensees are small entities that may be affected by the rules and policies adopted herein.

44. *Broadband Radio Service and Educational Broadband Service.* Broadband Radio Service comprises Multichannel Multipoint Distribution Service (MMDS) systems and Multipoint Distribution Service (MDS).<sup>123</sup> MMDS systems, often referred to as "wireless cable," transmit video programming to subscribers using the microwave frequencies of MDS and Educational Broadband Service (formerly

<sup>116</sup> 13 C.F.R. § 121.201, NAICS code 517212.

<sup>117</sup> This service is governed by Subpart I of Part 22 of the Commission's rules. See 47 C.F.R. §§ 22.1001-22.1037.

<sup>118</sup> 13 C.F.R. § 121.201, NAICS code 513322 (changed to 517212 in October 2002).

<sup>119</sup> *Id.*

<sup>121</sup> *Id.*

<sup>122</sup> See Letter to Kathleen O'Brien Ham, Chief, Auctions and Industry Analysis Division, Wireless Telecommunications Bureau, FCC, from Aida Alvarez, Administrator, SBA (Feb. 4, 1998).

<sup>123</sup> *Amendment of Parts 1, 21.73, 74, and 101 of the Commission's Rules to Facilitate the Provision of Fixed and Mobile Broadband Access, Educational and Other Advanced Services in the 2150-2162 and 2500-2690 MHz Bands*, WT Docket No. 03-66, RM-10586, Report and Order and Further Notice of Proposed Rulemaking, 19 FCC Rcd 14165 (2004).

known as Instructional Television Fixed Service).<sup>124</sup> In connection with the 1996 MDS auction, the Commission established a small business size standard as an entity that had annual average gross revenues of less than \$40 million in the previous three calendar years.<sup>125</sup> The MDS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 Basic Trading Areas (BTAs). Of the 67 auction winners, 61 met the definition of a small business. MDS also includes licensees of stations authorized prior to the auction. In addition, the SBA has developed a small business size standard for Cable and Other Program Distribution, which includes all such companies generating \$12.5 million or less in annual receipts.<sup>126</sup> According to Census Bureau data for 1997, there were a total of 1,311 firms in this category, total, that had operated for the entire year.<sup>127</sup> Of this total, 1,180 firms had annual receipts of under \$10 million and an additional 52 firms had receipts of \$10 million or more but less than \$25 million. Consequently, we estimate that the majority of providers in the Broadband Radio Service category are small businesses that may be affected by the rules and policies adopted herein. This SBA small business size standard also appears applicable to Educational Broadband Service. There are presently 2,032 Educational Broadband Service licensees. All but 100 of these licenses are held by educational institutions. Educational institutions are included in this analysis as small entities.<sup>128</sup> Thus, we tentatively conclude that at least 1,932 licensees are small businesses.

45. *Local Multipoint Distribution Service.* Local Multipoint Distribution Service (LMDS) is a fixed broadband point-to-multipoint microwave service that provides for two-way video telecommunications.<sup>129</sup> The auction of the 1,030 Local Multipoint Distribution Service (LMDS) licenses began on February 18, 1998 and closed on March 25, 1998. The Commission established a small business size standard for LMDS licenses as an entity that has average gross revenues of less than \$40 million in the three previous calendar years.<sup>130</sup> An additional small business size standard for "very small business" was added as an entity that, together with its affiliates, has average gross revenues of not more than \$15 million for the preceding three calendar years.<sup>131</sup> The SBA has approved these small business size standards in the context of LMDS auctions.<sup>132</sup> There were 93 winning bidders that qualified as small entities in the LMDS auctions. A total of 93 small and very small business bidders won approximately 277 A Block licenses and 387 B Block licenses. On March 27, 1999, the Commission re-auctioned 161 licenses; there were 40 winning bidders. Based on this information, we conclude that the number of small LMDS licenses consists of the 93 winning bidders in the first auction and the 40 winning bidders in the re-auction, for a total of 133 small entity LMDS providers.

<sup>128</sup> In addition, the term "small entity" within SBREFA applies to small organizations (nonprofits) and to small governmental jurisdictions (cities, counties, towns, townships, villages, school districts, and special districts with populations of less than 50,000). 5 U.S.C. §§ 601(4)-(6). We do not collect annual revenue data on ITFS licensees.

<sup>129</sup> See *Local Multipoint Distribution Service*, Second Report and Order, 12 FCC Rcd 12545 (1997).

<sup>130</sup> *Id.*

<sup>131</sup> See *id.*

<sup>132</sup> See Letter to Dan Phythyon, Chief, Wireless Telecommunications Bureau, FCC, from Aida Alvarez, Administrator, SBA (Jan. 6, 1998).

46. *218-219 MHz Service.* The first auction of 218-219 MHz spectrum resulted in 170 entities winning licenses for 594 Metropolitan Statistical Area (MSA) licenses. Of the 594 licenses, 557 were won by entities qualifying as a small business. For that auction, the small business size standard was an entity that, together with its affiliates, has no more than a \$6 million net worth and, after federal income taxes (excluding any carry over losses), has no more than \$2 million in annual profits each year for the previous two years.<sup>133</sup> In the *218-219 MHz Report and Order and Memorandum Opinion and Order*, we established a small business size standard for a "small business" as an entity that, together with its affiliates and persons or entities that hold interests in such an entity and their affiliates, has average annual gross revenues not to exceed \$15 million for the preceding three years.<sup>134</sup> A "very small business" is defined as an entity that, together with its affiliates and persons or entities that hold interests in such an entity and its affiliates, has average annual gross revenues not to exceed \$3 million for the preceding three years.<sup>135</sup> We cannot estimate, however, the number of licenses that will be won by entities qualifying as small or very small businesses under our rules in future auctions of 218-219 MHz spectrum.

47. *24 GHz – Incumbent Licensees.* This analysis may affect incumbent licensees who were relocated to the 24 GHz band from the 18 GHz band, and applicants who wish to provide services in the 24 GHz band. The applicable SBA small business size standard is that of "Cellular and Other Wireless Telecommunications" companies. This category provides that such a company is small if it employs no more than 1,500 persons.<sup>136</sup> According to Census Bureau data for 1997, there were 977 firms in this category, total, that operated for the entire year.<sup>137</sup> Of this total, 965 firms had employment of 999 or fewer employees, and an additional 12 firms had employment of 1,000 employees or more.<sup>138</sup> Thus, under this size standard, the great majority of firms can be considered small. These broader census data notwithstanding, we believe that there are only two licensees in the 24 GHz band that were relocated from the 18 GHz band, Teligent<sup>139</sup> and TRW, Inc. It is our understanding that Teligent and its related companies have less than 1,500 employees, though this may change in the future. TRW is not a small entity. Thus, only one incumbent licensee in the 24 GHz band is a small business entity.

48. *24 GHz – Future Licensees.* With respect to new applicants in the 24 GHz band, the small business size standard for "small business" is an entity that, together with controlling interests and

<sup>133</sup> *Implementation of Section 309(j) of the Communications Act – Competitive Bidding*, PP Docket No. 93-253, Fourth Report and Order, 59 Fed. Reg. 24947 (May 13, 1994).

<sup>137</sup> U.S. Census Bureau, 1997 Economic Census, Subject Series: Information, "Employment Size of Firms Subject to Federal Income Tax: 1997," Table 5, NAICS code 513322 (issued Oct. 2000).

<sup>138</sup> *Id.* The census data do not provide a more precise estimate of the number of firms that have employment of 1,500 or fewer employees; the largest category provided is "Firms with 1,000 employees or more."

<sup>139</sup> Teligent acquired the DEMS licenses of FirstMark, the only licensee other than TRW in the 24 GHz band whose license has been modified to require relocation to the 24 GHz band.

affiliates, has average annual gross revenues for the three preceding years not in excess of \$15 million.<sup>140</sup> “Very small business” in the 24 GHz band is an entity that, together with controlling interests and affiliates, has average gross revenues not exceeding \$3 million for the preceding three years.<sup>141</sup> The SBA has approved these small business size standards.<sup>142</sup> These size standards will apply to the future auction, if held.

## 2. Cable and OVS Operators

49. *Cable and Other Program Distribution.* This category includes cable systems operators, closed circuit television services, direct broadcast satellite services, multipoint distribution systems, satellite master antenna systems, and subscription television services. The SBA has developed small business size standard for this census category, which includes all such companies generating \$12.5 million or less in revenue annually.<sup>143</sup> According to Census Bureau data for 1997, there were a total of 1,311 firms in this category, total, that had operated for the entire year.<sup>144</sup> Of this total, 1,180 firms had annual receipts of under \$10 million and an additional 52 firms had receipts of \$10 million or more but less than \$25 million. Consequently, the Commission estimates that the majority of providers in this service category are small businesses that may be affected by the rules and policies adopted herein.

50. *Cable System Operators (Rate Regulation Standard).* The Commission has developed its own small business size standard for cable system operators, for purposes of rate regulation. Under the Commission’s rules, a “small cable company” is one serving fewer than 400,000 subscribers nationwide.<sup>145</sup> The most recent estimates indicate that there were 1,439 cable operators who qualified as small cable system operators at the end of 1995.<sup>146</sup> Since then, some of those companies may have grown to serve over 400,000 subscribers, and others may have been involved in transactions that caused them to be combined with other cable operators. Consequently, the Commission estimates that there are now fewer than 1,439 small entity cable system operators that may be affected by the rules and policies adopted herein.

51. *Cable System Operators (Telecom Act Standard).* The Communications Act of 1934, as amended, also contains a size standard for small cable system operators, which is “a cable operator that, directly or through an affiliate, serves in the aggregate fewer than 1 percent of all subscribers in the

<sup>140</sup> *Amendments to Parts 1, 2, 87 and 101 of the Commission’s Rules to License Fixed Services at 24 GHz*, Report and Order, 15 FCC Rcd 16934, 16967 (2000); see also 47 C.F.R. § 101.538(a)(2).

<sup>141</sup> *Amendments to Parts 1, 2, 87 and 101 of the Commission’s Rules to License Fixed Services at 24 GHz*, Report and Order, 15 FCC Rcd 16934, 16967 (2000); see also 47 C.F.R. § 101.538(a)(1).

<sup>142</sup> See Letter to Margaret W. Wiener, Deputy Chief, Auctions and Industry Analysis Division, Wireless Telecommunications Bureau, FCC, from Gary M. Jackson, Assistant Administrator, SBA (July 28, 2000).

<sup>143</sup> 13 C.F.R. § 121.201, North American Industry Classification System (NAICS) code 513220 (changed to 517510 in October 2002).

<sup>144</sup> U.S. Census Bureau, 1997 Economic Census, Subject Series: Information, “Establishment and Firm Size (Including Legal Form of Organization),” Table 4, NAICS code 513220 (issued October 2000).

<sup>145</sup> 47 C.F.R. § 76.901(e). The Commission developed this definition based on its determination that a small cable system operator is one with annual revenues of \$100 million or less. *Implementation of Sections of the 1992 Cable Act: Rate Regulation*, Sixth Report and Order and Eleventh Order on Reconsideration, 10 FCC Rcd 7393 (1995), 60 FR 10534 (Feb. 27, 1995).

<sup>146</sup> Paul Kagan Associates, Inc., *Cable TV Investor*, February 29, 1996 (based on figures for December 30, 1995).

United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed \$250,000,000.<sup>147</sup> The Commission has determined that there are 67,700,000 subscribers in the United States.<sup>148</sup> Therefore, an operator serving fewer than 677,000 subscribers shall be deemed a small operator, if its annual revenues, when combined with the total annual revenues of all its affiliates, do not exceed \$250 million in the aggregate.<sup>149</sup> Based on available data, the Commission estimates that the number of cable operators serving 677,000 subscribers or fewer, totals 1,450.<sup>150</sup> The Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed \$250 million,<sup>151</sup> and therefore are unable, at this time, to estimate more accurately the number of cable system operators that would qualify as small cable operators under the size standard contained in the Communications Act of 1934.

52. *Open Video Services.* Open Video Service (OVS) systems provide subscription services.<sup>152</sup> The SBA has created a small business size standard for Cable and Other Program Distribution.<sup>153</sup> This standard provides that a small entity is one with \$12.5 million or less in annual receipts. The Commission has certified approximately 25 OVS operators to serve 75 areas, and some of these are currently providing service.<sup>154</sup> Affiliates of Residential Communications Network, Inc. (RCN) received approval to operate OVS systems in New York City, Boston, Washington, D.C., and other areas. RCN has sufficient revenues to assure that they do not qualify as a small business entity. Little financial information is available for the other entities that are authorized to provide OVS and are not yet operational. Given that some entities authorized to provide OVS service have not yet begun to generate revenues, the Commission concludes that up to 24 OVS operators (those remaining) might qualify as small businesses that may be affected by the rules and policies adopted herein.

### 3. Internet Service Providers

53. *Internet Service Providers.* The SBA has developed a small business size standard for Internet Service Providers (ISPs). ISPs “provide clients access to the Internet and generally provide related services such as web hosting, web page designing, and hardware or software consulting related to Internet connectivity.”<sup>155</sup> Under the SBA size standard, such a business is small if it has average annual receipts

<sup>147</sup> 47 U.S.C. § 543(m)(2).

<sup>148</sup> See *FCC Announces New Subscriber Count for the Definition of Small Cable Operator*, Public Notice DA 01-158 (Jan. 24, 2001).

<sup>149</sup> 47 C.F.R. § 76.901(f).

<sup>150</sup> See *FCC Announces New Subscriber Count for the Definition of Small Cable Operators*, Public Notice, DA 01-0158 (rel. Jan. 24, 2001).

<sup>151</sup> The Commission does receive such information on a case-by-case basis if a cable operator appeals a local franchise authority’s finding that the operator does not qualify as a small cable operator pursuant to § 76.901(f) of the Commission’s rules. See 47 C.F.R. § 76.909(b).

<sup>152</sup> See 47 U.S.C. § 573.

<sup>153</sup> 13 C.F.R. § 121.201, NAICS code 513220 (changed to 517510 in October 2002).

<sup>154</sup> See <<http://www.fcc.gov/csb/ovs/csovsccer.html>> (current as of March 2002).

<sup>155</sup> U.S. Census Bureau, “2002 NAICS Definitions: 518111 Internet Service Providers” (Feb. 2004) <[www.census.gov](http://www.census.gov)>.

of \$21 million or less.<sup>156</sup> According to Census Bureau data for 1997, there were 2,751 firms in this category that operated for the entire year.<sup>157</sup> Of these, 2,659 firms had annual receipts of under \$10 million, and an additional 67 firms had receipts of between \$10 million and \$24,999,999. Consequently, we estimate that the majority of these firms are small entities that may be affected by our action. In addition, limited preliminary census data for 2002 indicate that the total number of Internet service providers increased approximately five percent from 1997 to 2002.<sup>158</sup>

#### 4. Other Internet-Related Entities

54. *Web Search Portals.* Our action pertains to VoIP services, which could be provided by entities that provide other services such as email, online gaming, web browsing, video conferencing, instant messaging, and other, similar IP-enabled services. The Commission has not adopted a size standard for entities that create or provide these types of services or applications. However, the census bureau has identified firms that “operate web sites that use a search engine to generate and maintain extensive databases of Internet addresses and content in an easily searchable format. Web search portals often provide additional Internet services, such as e-mail, connections to other web sites, auctions, news, and other limited content, and serve as a home base for Internet users.”<sup>159</sup> The SBA has developed a small business size standard for this category; that size standard is \$6 million or less in average annual receipts.<sup>160</sup> According to Census Bureau data for 1997, there were 195 firms in this category that operated for the entire year.<sup>161</sup> Of these, 172 had annual receipts of under \$5 million, and an additional nine firms had receipts of between \$5 million and \$9,999,999. Consequently, we estimate that the majority of these firms are small entities that may be affected by our action.

55. *Data Processing, Hosting, and Related Services.* Entities in this category “primarily . . . provid[e] infrastructure for hosting or data processing services.”<sup>162</sup> The SBA has developed a small business size standard for this category; that size standard is \$21 million or less in average annual receipts.<sup>163</sup> According to Census Bureau data for 1997, there were 3,700 firms in this category that

<sup>156</sup> 13 C.F.R. § 121.201, NAICS code 518111 (changed from previous code 514191, “On-Line Information Services,” in Oct. 2002).

<sup>157</sup> U.S. Census Bureau, 1997 Economic Census, Subject Series: Information, “Establishment and Firm Size (Including Legal Form of Organization),” Table 4, NAICS code 514191 (issued Oct. 2000).

<sup>158</sup> See U.S. Census Bureau, 2002 Economic Census, Industry Series: “Information,” Table 2, Comparative Statistics for the United States (1997 NAICS Basis): 2002 and 1997, NAICS code 514191 (issued Nov. 2004). The preliminary data indicate that the total number of “establishments” increased from 4,165 to 4,394. In this context, the number of establishments is a less helpful indicator of small business prevalence than is the number of “firms,” because the latter number takes into account the concept of common ownership or control. The more helpful 2002 census data on firms, including employment and receipts numbers, will be issued in late 2005.

<sup>159</sup> U.S. Census Bureau, “2002 NAICS Definitions: 518112 Web Search Portals” (Feb. 2004) <www.census.gov>.

<sup>160</sup> 13 C.F.R. § 121.201, NAICS code 518112 (changed from 514199 in Oct. 2002).

<sup>161</sup> U.S. Census Bureau, 1997 Economic Census, Subject Series: Information, “Establishment and Firm Size (Including Legal Form of Organization),” Table 4, NAICS code 514199 (issued Oct. 2000). This category was created for the 2002 Economic Census by taking a portion of the superseded 1997 category, “All Other Information Services,” NAICS code 514199. The data cited in the text above are derived from the superseded category.

<sup>162</sup> U.S. Census Bureau, “2002 NAICS Definitions: 518210 Data Processing, Hosting, and Related Services” (Feb. 2004) <www.census.gov>.

<sup>163</sup> 13 C.F.R. § 121.201, NAICS code 518210 (changed from 514210 in Oct. 2002).

operated for the entire year.<sup>164</sup> Of these, 3,477 had annual receipts of under \$10 million, and an additional 108 firms had receipts of between \$10 million and \$24,999,999. Consequently, we estimate that the majority of these firms are small entities that may be affected by our action.

56. *All Other Information Services.* “This industry comprises establishments primarily engaged in providing other information services (except new syndicates and libraries and archives).”<sup>165</sup> Our action pertains to VoIP services, which could be provided by entities that provide other services such as email, online gaming, web browsing, video conferencing, instant messaging, and other, similar IP-enabled services. The SBA has developed a small business size standard for this category; that size standard is \$6 million or less in average annual receipts.<sup>166</sup> According to Census Bureau data for 1997, there were 195 firms in this category that operated for the entire year.<sup>167</sup> Of these, 172 had annual receipts of under \$5 million, and an additional nine firms had receipts of between \$5 million and \$9,999,999. Consequently, we estimate that the majority of these firms are small entities that may be affected by our action.

57. *Internet Publishing and Broadcasting.* “This industry comprises establishments engaged in publishing and/or broadcasting content on the Internet exclusively. These establishments do not provide traditional (non-Internet) versions of the content that they publish or broadcast.”<sup>168</sup> The SBA has developed a small business size standard for this new (2002) census category; that size standard is 500 or fewer employees.<sup>169</sup> To assess the prevalence of small entities in this category, we will use 1997 Census Bureau data for a relevant, now-superseded census category, “All Other Information Services.” The SBA small business size standard for that prior category was \$6 million or less in average annual receipts. According to Census Bureau data for 1997, there were 195 firms in the prior category that operated for the entire year.<sup>170</sup> Of these, 172 had annual receipts of under \$5 million, and an additional nine firms had receipts of between \$5 million and \$9,999,999. Consequently, we estimate that the majority of the firms in this current category are small entities that may be affected by our action.

58. *Software Publishers.* These companies may design, develop or publish software and may provide other support services to software purchasers, such as providing documentation or assisting in installation. The companies may also design software to meet the needs of specific users. The SBA has developed a small business size standard of \$21 million or less in average annual receipts for all of the following pertinent categories: Software Publishers, Custom Computer Programming Services, and Other

<sup>164</sup> U.S. Census Bureau, 1997 Economic Census, Subject Series: Information, “Establishment and Firm Size (Including Legal Form of Organization),” Table 4, NAICS code 514210 (issued Oct. 2000).

<sup>169</sup> 13 C.F.R. § 121.201, NAICS code 516110 (derived from 514199 and other 1997 codes).

<sup>170</sup> U.S. Census Bureau, 1997 Economic Census, Subject Series: Information, “Establishment and Firm Size (Including Legal Form of Organization),” Table 4, NAICS code 514199 (issued Oct. 2000). This category was created for the 2002 Economic Census by taking portions of numerous 1997 categories.

Computer Related Services.<sup>171</sup> For Software Publishers, Census Bureau data for 1997 indicate that there were 8,188 firms in the category that operated for the entire year.<sup>172</sup> Of these, 7,633 had annual receipts under \$10 million, and an additional 289 firms had receipts of between \$10 million and \$24,999,999. For providers of Custom Computer Programming Services, the Census Bureau data indicate that there were 19,334 firms that operated for the entire year.<sup>173</sup> Of these, 18,786 had annual receipts of under \$10 million, and an additional 352 firms had receipts of between \$10 million and \$24,999,999. For providers of Other Computer Related Services, the Census Bureau data indicate that there were 5,524 firms that operated for the entire year.<sup>174</sup> Of these, 5,484 had annual receipts of under \$10 million, and an additional 28 firms had receipts of between \$10 million and \$24,999,999. Consequently, we estimate that the majority of the firms in each of these three categories are small entities that may be affected by our action.

## 5. Equipment Manufacturers

59. The equipment manufacturers described in this section are apparently merely indirectly affected by our current action, and therefore would not formally be a part of this RFA analysis. We have included them, however, to broaden the record in this proceeding and to alert them to our decisions.

60. *Wireless Communications Equipment Manufacturers.* The SBA has established a small business size standard for Radio and Television Broadcasting and Wireless Communications Equipment Manufacturing. Examples of products in this category include “transmitting and receiving antennas, cable television equipment, GPS equipment, pagers, cellular phones, mobile communications equipment, and radio and television studio and broadcasting equipment”<sup>175</sup> and may include other devices that transmit and receive IP-enabled services, such as personal digital assistants (PDAs). Under the SBA size standard, firms are considered small if they have 750 or fewer employees.<sup>176</sup> According to Census Bureau data for 1997, there were 1,215 establishments<sup>177</sup> in this category that operated for the entire year.<sup>178</sup> Of those, there were 1,150 that had employment of under 500, and an additional 37 that had employment of

<sup>171</sup> 13 C.F.R. § 121.201, NAICS codes 511210, 541511, and 541519.

<sup>172</sup> U.S. Census Bureau, 1997 Economic Census, Subject Series: Information, “Establishment and Firm Size (Including Legal Form of Organization),” Table 4, NAICS code 511210 (issued Oct. 2000).

<sup>173</sup> U.S. Census Bureau, 1997 Economic Census, Subject Series: Professional, Scientific, and Technical Services, “Establishment and Firm Size (Including Legal Form of Organization),” Table 4a, NAICS code 541511 (issued Oct. 2000).

<sup>174</sup> U.S. Census Bureau, 1997 Economic Census, Subject Series: Professional, Scientific, and Technical Services, “Establishment and Firm Size (Including Legal Form of Organization),” Table 4a, NAICS code 541519 (issued Oct. 2000).

<sup>175</sup> Office of Management and Budget, North American Industry Classification System 308-09 (1997) (NAICS code 334220).

<sup>176</sup> 13 C.F.R. § 121.201, NAICS code 334220.

<sup>177</sup> The number of “establishments” is a less helpful indicator of small business prevalence in this context than would be the number of “firms” or “companies,” because the latter take into account the concept of common ownership or control. Any single physical location for an entity is an establishment, even though that location may be owned by a different establishment. Thus, the numbers given may reflect inflated numbers of businesses in this category, including the numbers of small businesses. In this category, the Census breaks-out data for firms or companies only to give the total number of such entities for 1997, which were 1,089.

<sup>178</sup> U.S. Census Bureau, 1997 Economic Census, Industry Series: Manufacturing, “Industry Statistics by Employment Size,” Table 4, NAICS code 334220 (issued Aug. 1999).

500 to 999. The percentage of wireless equipment manufacturers in this category was approximately 61.35%,<sup>179</sup> so we estimate that the number of wireless equipment manufacturers with employment of under 500 was actually closer to 706, with an additional 23 establishments having employment of between 500 and 999. Consequently, we estimate that the majority of wireless communications equipment manufacturers are small entities that may be affected by our action.

61. *Telephone Apparatus Manufacturing.* This category “comprises establishments primarily engaged primarily in manufacturing wire telephone and data communications equipment.”<sup>180</sup> Examples of pertinent products are “central office switching equipment, cordless telephones (except cellular), PBX equipment, telephones, telephone answering machines, and data communications equipment, such as bridges, routers, and gateways.”<sup>181</sup> The SBA has developed a small business size standard for this category of manufacturing; that size standard is 1,000 or fewer employees.<sup>182</sup> According to Census Bureau data for 1997, there were 598 establishments in this category that operated for the entire year.<sup>183</sup> Of these, 574 had employment of under 1,000, and an additional 17 establishments had employment of 1,000 to 2,499. Consequently, we estimate that the majority of these establishments are small entities that may be affected by our action.

62. *Electronic Computer Manufacturing.* This category “comprises establishments primarily engaged in manufacturing and/or assembling electronic computers, such as mainframes, personal computers, workstations, laptops, and computer servers.”<sup>184</sup> The SBA has developed a small business size standard for this category of manufacturing; that size standard is 1,000 or fewer employees.<sup>185</sup> According to Census Bureau data for 1997, there were 563 establishments in this category that operated for the entire year.<sup>186</sup> Of these, 544 had employment of under 1,000, and an additional 11 establishments had employment of 1,000 to 2,499. Consequently, we estimate that the majority of these establishments are small entities that may be affected by our action.

63. *Computer Terminal Manufacturing.* “Computer terminals are input/output devices that connect with a central computer for processing.”<sup>187</sup> The SBA has developed a small business size standard for this category of manufacturing; that size standard is 1,000 or fewer employees.<sup>188</sup> According to Census

<sup>179</sup> *Id.* at Table 5.

<sup>187</sup> Office of Management and Budget, North American Industry Classification System 307 (1997) (NAICS code 334113).

<sup>188</sup> 13 C.F.R. § 121.201, NAICS code 334113.

Bureau data for 1997, there were 142 establishments in this category that operated for the entire year, and all of the establishments had employment of under 1,000.<sup>189</sup> Consequently, we estimate that the majority or all of these establishments are small entities that may be affected by our action.

64. *Other Computer Peripheral Equipment Manufacturing.* Examples of peripheral equipment in this category include keyboards, mouse devices, monitors, and scanners.<sup>190</sup> The SBA has developed a small business size standard for this category of manufacturing; that size standard is 1,000 or fewer employees.<sup>191</sup> According to Census Bureau data for 1997, there were 1061 establishments in this category that operated for the entire year.<sup>192</sup> Of these, 1,046 had employment of under 1,000, and an additional six establishments had employment of 1,000 to 2,499. Consequently, we estimate that the majority of these establishments are small entities that may be affected by our action.

65. *Fiber Optic Cable Manufacturing.* These establishments manufacture “insulated fiber-optic cable from purchased fiber-optic strand.”<sup>193</sup> The SBA has developed a small business size standard for this category of manufacturing; that size standard is 1,000 or fewer employees.<sup>194</sup> According to Census Bureau data for 1997, there were 38 establishments in this category that operated for the entire year.<sup>195</sup> Of these, 37 had employment of under 1,000, and one establishment had employment of 1,000 to 2,499. Consequently, we estimate that the majority of these establishments are small entities that may be affected by our action.

66. *Other Communication and Energy Wire Manufacturing.* These establishments manufacture “insulated wire and cable of nonferrous metals from purchased wire.”<sup>196</sup> The SBA has developed a small business size standard for this category of manufacturing; that size standard is 1,000 or fewer employees.<sup>197</sup> According to Census Bureau data for 1997, there were 275 establishments in this category that operated for the entire year.<sup>198</sup> Of these, 271 had employment of under 1,000, and four establishments had employment of 1,000 to 2,499. Consequently, we estimate that the majority or all of these establishments are small entities that may be affected by our action.

<sup>198</sup> U.S. Census Bureau, 1997 Economic Census, Industry Series: Manufacturing, “Other Communication and Energy Wire Manufacturing,” Table 4, NAICS code 335929 (issued Nov. 1999).

67. *Audio and Video Equipment Manufacturing.* These establishments manufacture “electronic audio and video equipment for home entertainment, motor vehicle, public address and musical instrument amplifications.”<sup>199</sup> The SBA has developed a small business size standard for this category of manufacturing; that size standard is 750 or fewer employees.<sup>200</sup> According to Census Bureau data for 1997, there were 554 establishments in this category that operated for the entire year.<sup>201</sup> Of these, 542 had employment of under 500, and nine establishments had employment of 500 to 999. Consequently, we estimate that the majority of these establishments are small entities that may be affected by our action.

68. *Electron Tube Manufacturing.* These establishments are “primarily engaged in manufacturing electron tubes and parts (except glass blanks).”<sup>202</sup> The SBA has developed a small business size standard for this category of manufacturing; that size standard is 750 or fewer employees.<sup>203</sup> According to Census Bureau data for 1997, there were 158 establishments in this category that operated for the entire year.<sup>204</sup> Of these, 148 had employment of under 500, and three establishments had employment of 500 to 999. Consequently, we estimate that the majority of these establishments are small entities that may be affected by our action.

69. *Bare Printed Circuit Board Manufacturing.* These establishments are “primarily engaged in manufacturing bare (i.e., rigid or flexible) printed circuit boards without mounted electronic components.”<sup>205</sup> The SBA has developed a small business size standard for this category of manufacturing; that size standard is 500 or fewer employees.<sup>206</sup> According to Census Bureau data for 1997, there were 1,389 establishments in this category that operated for the entire year.<sup>207</sup> Of these, 1,369 had employment of under 500, and 16 establishments had employment of 500 to 999. Consequently, we estimate that the majority of these establishments are small entities that may be affected by our action.

70. *Semiconductor and Related Device Manufacturing.* These establishments manufacture “computer storage devices that allow the storage and retrieval of data from a phase change, magnetic, optical, or magnetic/optical media.”<sup>208</sup> The SBA has developed a small business size standard for this

**D. Description of Projected Reporting, Recordkeeping and Other Compliance Requirements**

78. Should the Commission decide to adopt any regulations to ensure that consumer protection needs are met by all providers of broadband Internet access service, the associated rules potentially could modify the reporting and recordkeeping requirements of certain broadband Internet access services providers. We could, for instance, require that broadband Internet access service providers must comply with slamming, truth-in-billing-type protections, or network outage reporting requirements. These proposals may impose additional reporting or recordkeeping requirements on entities. We seek comment on the possible burden these requirements would place on small entities. Also, we seek comment on whether a special approach toward any possible compliance burdens on small entities might be appropriate. Entities, especially small businesses, are encouraged to quantify the costs and benefits of any reporting requirement that may be established in this proceeding.

**E. Steps Taken to Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered**

79. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include (among others) the following four alternatives: (1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.<sup>232</sup>

80. The Commission's primary objective is to develop a framework for consumer protection in the broadband era – a framework that ensures that consumer protection needs are met by all providers of broadband Internet access service, regardless of the underlying technology. We seek comment here on the effect the various proposals described in the *Notice*, and summarized below, will have on small entities, and on what effect alternative rules would have on those entities. We invite comment on ways in which the Commission can achieve its goal of protecting consumers while at the same time impose minimal burdens on small broadband Internet access service providers. With respect to any of our consumer protection regulations already in place, has the Commission adopted any provisions for small entities that we should similarly consider here?

81. *CPNI*. In this *Notice*, the Commission asks whether it should extend privacy requirements similar to the Act's CPNI requirements to providers of broadband Internet access services.<sup>233</sup> We ask, for example, whether we should forbid broadband Internet access providers from disclosing, without their customers' approval, information about their customers that they learn through the provision of their

<sup>231</sup> U.S. Census Bureau, 1997 Economic Census, Industry Series: Manufacturing, "Computer Storage Device Manufacturing," Table 4, NAICS code 334112 (issued July 1999).

<sup>232</sup> 5 U.S.C. § 603(c).

<sup>233</sup> See *supra* *Notice* at para. 149.

broadband Internet access service.<sup>234</sup> By developing the record with respect to privacy concerns, the Commission can appropriately determine whether providers of broadband Internet access services, including small entities, should be subject to similar privacy regulations.<sup>235</sup>

82. *Slamming.* We seek comment on whether we should impose slamming requirements on providers of broadband Internet access service and to explain in what circumstances subscribers to broadband Internet access could get “slammed.”<sup>236</sup> We also ask whether the provisioning process for broadband Internet access service is such that an unauthorized change in provider is more likely in situations where the provider relies on third-party broadband transmission facilities.<sup>237</sup> We recognize that small broadband Internet access service providers may rely more on third-party broadband transmission facilities and could potentially inform the Commission as to whether slamming is likely to occur in those situations.

83. *Truth-in-Billing.* We invite comment on whether we should impose requirements on broadband Internet access service providers that are similar to our truth-in-billing requirements or are otherwise geared toward reducing slamming, cramming, or other types of telecommunications-related fraud.<sup>238</sup> We ask parties to explain what problems customers of broadband Internet access service are likely to have with their bills and whether we should address these problems through truth-in-billing-type requirements.<sup>239</sup> What effect will this proposal have on small entities, and are there alternatives to imposing truth-in-billing type regulations?

84. *Network Outage Reporting.* We seek comment as to whether broadband Internet access service providers should notify the Commission of outages of thirty or more minutes that affect a substantial number of customers or involve major airports, major military installations, key government facilities, nuclear power plants, or 911 facilities.<sup>240</sup> We encourage small entities to identify any alternatives that would protect consumers while at the same time minimizing any burden on small broadband Internet access providers.

85. *Section 214 Discontinuance.* In the *Notice*, the Commission stated that section 214 of the Act limits a telecommunications carrier’s ability to discontinue unilaterally its service to customers.<sup>241</sup> The Commission’s implementing rules generally require that domestic carriers wishing to “discontinue, reduce, or impair” services must first request authority to do so from the Commission and must notify affected customers and others of their plans. We ask whether the Commission should impose discontinuance-type requirements on providers of broadband Internet access service.<sup>242</sup>

86. *Section 254(g) Rate Averaging Requirements.* In the *Notice*, the Commission explains that section 254(g) required the Commission to adopt rules “to require that the rates charged by providers of

<sup>242</sup> See *id.* at para. 156.

interexchange telecommunications services to subscribers in rural and high cost areas . . . be no higher than the rates charged by each such provider to its subscribers in urban areas.”<sup>243</sup> We ask, for example, whether we should adopt similar rate averaging requirements on providers of broadband Internet access services, particularly as consumers substitute broadband services and applications for narrowband services that were covered by section 254(g).<sup>244</sup>

87. In the *Notice*, we ask commenters to address whether the imposition of regulations pursuant to our ancillary jurisdiction, and the corresponding ability of consumers to take advantage of Commission avenues for resolution of consumer protection issues, is desirable and necessary as a matter of public policy, or whether we should rely on market forces to address some or all of the areas listed.<sup>245</sup> The option of relying on market forces may benefit entities, especially small entities, who may find it costly or burdensome to comply with Commission regulations. We also ask whether these types of regulations are more or less relevant in the context of broadband Internet access service than they are for traditional telephony services.<sup>246</sup> In addition, we ask commenters to describe any technical, economic, or other impediments that may affect the ability of broadband Internet access service providers to comply with such regulations. We also ask whether there are areas of consumer protection not listed above for which the Commission should impose regulations.<sup>247</sup>

88. *Federal and State Involvement.* To the extent that the Commission finds it necessary to impose consumer protection and related regulations on broadband Internet access service providers, we also seek comment on how best to harmonize federal regulations with the states’ efforts and expertise in these areas.<sup>248</sup>

**F. Federal Rules that May Duplicate, Overlap, or Conflict with the Proposed Rules**

89. None.

**STATEMENT OF  
CHAIRMAN KEVIN J. MARTIN**

*Re: Appropriate Framework for Broadband Access to the Internet over Wireline Facilities, Universal Service Obligations of Broadband Providers (CC Docket No. 02-33), Review of Regulatory Requirements for Incumbent LEC Broadband Telecommunications Services (CC Docket No. 01-337), Computer III Further Remand Proceedings: Bell Operating Company Provision of Enhanced Services; 1998 Biennial Regulatory Review – Review of Computer III and ONA Safeguards and Requirements (CC Docket Nos. 95-20, 98-10), Conditional Petition of the Verizon Telephone Companies for Forbearance Under 47 U.S.C. § 160(c) with Regard to Broadband Services Provided Via Fiber to the Premises; Petition of the Verizon Telephone Companies for Declaratory Ruling or, Alternatively, for Interim Waiver with Regard to Broadband Services Provided Via Fiber to the Premises (WC Docket No. 04-242), Consumer Protection in the Broadband Era (WC Docket No. 05-271)*

The Order that we adopt today is a momentous one. It ends the regulatory inequities that currently exist between cable and telephone companies in their provision of broadband Internet services. As I have said on numerous occasions, leveling the playing field between these providers has been one of my highest priorities. With this Order, wireline broadband Internet access providers, like cable modem service providers, will be considered information service providers and will no longer be compelled by regulation to unbundle and separately tariff the underlying transmission component of their Internet access service.

Most importantly, however, the actions we take in this Order are an explicit recognition that the telecommunications marketplace that exists today is vastly different from the one governed by regulators over 30 years ago. The *Computer Inquiry* requirements that were adopted several decades ago were based on the assumption that, without the imposition of strict regulation, telephone companies would be able to exert considerable market power over unaffiliated entities in the provision of information services. To the extent that this assumption was true at the time, it is no longer true in today's broadband market.

As the item recognizes, the broadband Internet access market today is characterized by multiple platforms that are vigorously competing for customers. Such changed market conditions require, as the Supreme Court in the *Brand X* decision phrased it, a "fresh analysis." I am pleased that the Commission so quickly undertook this analysis, and, in so doing, removed legacy regulation that applied to only one of the platform providers – the telephone companies.

Broadband deployment is vitally important to our nation as new, advanced services hold the promise of unprecedented business, educational, and healthcare opportunities for all Americans. Perpetuating the application of outdated regulations on only one set of Internet access providers inhibits infrastructure investment, innovation, and competition generally.

In taking these actions, we recognize that change is never easy. Nor can it be effectuated overnight. ISPs currently rely on the transmission offerings that the telephone companies have been compelled by regulation to make available. Such a transition is vital to the continuity of service for thousands of customers. To this end, we require the telephone companies to make their current transmission offerings available for one year from the effective date of this Order.

Similarly, we cannot permit the telephone companies to immediately cease contributing to the universal service fund on the portion of revenues derived from these tariffed Internet access offerings. We must ensure the stability of the fund. Accordingly, we require telephone companies to continue

contributing to the universal service fund on their Internet access services based on their current contribution levels for 270 days following the effective date of the Order or until we adopt new contribution rules, whichever comes first. Either way, the Commission will act diligently to ensure that there will be no adverse impact to the fund as a result of the holdings today.

Although we are confronting a changed marketplace, government will continue to have a role in this dynamic, new broadband marketplace. Together with our state colleagues, the Commission must vigilantly ensure that law enforcement and consumer protection needs continue to be met. To accomplish this, we adopt a Notice of Proposed Rulemaking seeking comment on the extent to which we need to develop a consumer protection framework that applies to all broadband Internet access platform providers, regardless of the underlying technology.

We also adopt today a vitally important companion item that confirms that facilities-based Internet access providers (as well as interconnection VoIP providers) are subject to the requirements of CALEA. Law enforcement agencies must have the ability to conduct electronic surveillance over broadband technologies.

The Commission also adopts today a Policy Statement that reflects each Commissioner's core beliefs about certain rights all consumers of broadband Internet access should have. Competition has ensured consumers have had these rights to date, and I remain confident that it will continue to do so.

I believe that, with the actions we take today, consumers will reap the benefits of increased Internet access competition and enjoy innovative high-speed services at lower prices. There is, however, more to do to stimulate infrastructure investment, broadband deployment, and competition in the broadband market. We intend to tackle these challenges in the upcoming months.

Finally, I want to thank my colleagues for their perseverance and commitment to work together to adopt this item today. It is an honor and a privilege to serve with such dedicated and capable public servants.

**STATEMENT OF  
COMMISSIONER KATHLEEN Q. ABERNATHY**

*Re: Appropriate Framework for Broadband Access to the Internet over Wireline Facilities, Universal Service Obligations of Broadband Providers (CC Docket No. 02-33), Review of Regulatory Requirements for Incumbent LEC Broadband Telecommunications Services (CC Docket No. 01-337), Computer III Further Remand Proceedings: Bell Operating Company Provision of Enhanced Services; 1998 Biennial Regulatory Review – Review of Computer III and ONA Safeguards and Requirements (CC Docket Nos. 95-20, 98-10), Conditional Petition of the Verizon Telephone Companies for Forbearance Under 47 U.S.C. § 160(c) with Regard to Broadband Services Provided Via Fiber to the Premises; Petition of the Verizon Telephone Companies for Declaratory Ruling or, Alternatively, for Interim Waiver with Regard to Broadband Services Provided Via Fiber to the Premises (WC Docket No. 04-242), Consumer Protection in the Broadband Era (WC Docket No. 05-271)*

Three and a half years ago, my colleagues and I made a promise to the American people: we promised that efforts to deploy twenty-first century broadband technologies for public use would not be crushed by the weight of 1930s-era regulations. To that end, we initiated a series of proceedings designed to reevaluate the role of traditional common carrier regulations in the blossoming market for broadband Internet access services.

We quickly determined that cable modem services should be free from the heavy burdens of Title II regulation. That determination was soon subject to legal challenge, and the resulting litigation effectively prevented action with regard to similar services provided over wireline facilities. In June's *NCTA v. Brand X* decision, the Supreme Court brought that period of uncertainty to a close, validating the Commission's authority to classify a broadband Internet access service as a Title I information service.

Today, with the benefit of the Court's guidance, we extend similar relief to providers of wireline broadband Internet access. Specifically, we clarify that wireline broadband Internet access services – like the cable modem services at issue in *Brand X* – are “information services,” and thus not automatically subject to the full range of Title II requirements designed for a narrowband, analog, one-wire world. We also lift the so-called “*Computer Inquiry*” requirements, which were crafted to prevent companies that exercised substantial market power in the provision of telecommunications from leveraging that dominance into the provision of enhanced services. Requirements such as these were never meant to apply in a competitive, multi-platform communications market such as the market for high-speed Internet access services.

And let there be no doubt: competition among broadband providers is flourishing. The Commission's most recent statistics show that over 80 percent of zip codes in America are served by two or more high-speed providers, about two-thirds are served by three or more, and over half are served by four or more. Moreover, I fully expect that providers taking advantage of new platforms will soon offer consumers even more choices in even more areas. Over 1.2 million high-speed lines in service today use wireless, satellite, fiber-optic, and powerline technologies; that number is poised to rise dramatically in the very near future. The result of such competition will be better and better services at lower and lower prices, with offerings designed to match customers' needs rather than regulators' preferences.

Today's decision is *not*, however, the end of the story. Wireline broadband providers are not subject to Title II or to the *Computer Inquiry* requirements, but that does not mean that they are immune from *all* regulatory requirements. When the Commission first issued its tentative conclusion that these services were outside the scope of Title II, I emphasized my commitment to preserving any specific

regulatory requirements that are necessary for the furtherance of critical policy objectives. In June, the *Brand X* majority made clear that the Commission retains the prerogative to exercise its Title I "ancillary jurisdiction" to do just that. The Commission has already made clear its intention to ensure access to emergency services as Americans transition to packet-switched communications technologies, irrespective of how those services are classified under the Communications Act. As we make clear in today's *Notice*, we will now turn our attention to other "social policy" requirements, such as those involving disability access, slamming, and consumer privacy. Where action is warranted, we will act.

There is still work to be done as we endeavor to establish a new, minimally regulated framework for the digital era. But however we address the issues that remain before us, I expect that our decision today will spur future investment in broadband infrastructure and provide the flexibility to which companies in a competitive market and their customers are entitled.

In short, I am confident that today's Order does much to fulfill our promise to the American people, and I am happy to support this item.

**STATEMENT OF  
COMMISSIONER MICHAEL J. COPPS,  
CONCURRING**

Re: *In the Matter of Appropriate Framework for Broadband Access to the Internet over Wireline Facilities; Universal Service Obligations of Broadband Providers; Review of Regulatory Requirements for Incumbent LEC Broadband Telecommunications Services; Computer III Further Remand Proceedings; Bell Operating Company Provision of Enhanced Services; 1998 Biennial Regulatory Review—Review of Computer III and ONA Safeguards and Requirements; Conditional Petition of the Verizon Telephone Companies for Forbearance Under 47 U.S.C. § 160(c) with Regard to Broadband Services Provided via Fiber to the Premises; Petition of the Verizon Telephone Companies for Declaratory Ruling or, Alternatively, for Interim Waiver with Regard to Broadband Services Provided via Fiber to the Premises; Consumer Protection in the Broadband Era, Report and Order and Notice of Proposed Rulemaking (CC Docket Nos. 02-33, 01-337, 95-20, 98-10, WC Docket No. 04-242)*

My goal as a Commissioner has always been to advance the public interest as far as I can with the tools at my disposal at the time. I objected strenuously to our original reclassification of cable modem and our tentative reclassification of wireline broadband. But the Supreme Court has fundamentally changed the legal landscape. I personally find the jurisprudence of Justice Scalia far more persuasive than that of the Court majority, and I agree wholeheartedly with Justice Scalia's observation that the previous Commission chose to achieve its objectives "through an implausible reading of the statute, and has thus exceeded the authority given it by Congress."

But neither Justice Scalia's opinion nor my personal reading will guide the Commission's approach going forward. The handwriting is on the wall. DSL *will* be reclassified, either now or soon from now, whether I agree or not. This is not a situation of my making or my preference, and I believe that it does not inure to the benefit of this institution or to consumers across the land. But when fundamental responsibilities like homeland security, universal service, disabilities access, enterprise competition, and Internet discrimination protections are on the chopping block, I feel compelled to work hard and be creative to advance the public interest rather than throwing up my hands. I therefore will concur in this proceeding to protect our ability to meet these core responsibilities.

As we enter the world of Title I today, we all know what the FCC's goals must be. Among other things, we must continue to protect homeland security. We must meet our universal service responsibilities. We must maintain disabilities access. We must protect fledgling competition. And we must state clearly that innovators, technology companies, and consumers will not face unfair discrimination on the Internet by network providers.

Our ability to advance these critical goals should progress as we advance to broadband. They should not shrink as we fiddle with legalisms and parse definitions. This item is not an exercise in hair-splitting about telecommunications services and information services. It is about how we promote the deployment of advanced communications while still staying true to our core values. Nonetheless, in recent years this Commission has irresponsibly reclassified services without addressing the larger implications of its decisions.

Today we begin to face up to this shortfall. The Order is far from ideal. But our actions today

are infinitely better than they otherwise might have been because of the intensive discussions we have had among the Commissioners. We have avoided the unacceptable scenario of reclassifying DSL and then punting all of the critical responsibilities listed above to some uncertain future deliberation. I could not have been party to that approach. But in the end, we moved away from that and made progress on numerous important statutory obligations:

- *Homeland Security:* We ensure that law enforcement officials will have the tools that they need to protect our country through the Communications Assistance for Law Enforcement Act and the National Security Emergency Preparedness Telecommunications Service Priority System.
- *Universal Service:* In addition, we ensure the stability of the universal service contribution base until the Commission agrees on a path forward. Universal service is critical to the Nation and critical to Congress. It is one of the pillars upon which the Communications Act is built, and I would never be party to this agency abandoning this program and the millions of Americans who depend on it. Absent the *Brand X* decision, we would have more with which to work, but in order to shield the program in this specific item we put in place a nine-month stay on any changes to DSL universal service responsibilities, unless the full Commission agrees on a new system before that time. If we do not do so within nine months the Order states that: “the Commission will take whatever action is necessary to preserve existing funding levels, including extending the [nine-month] period discussed above or expanding the contribution base” (emphasis added). That is a firm and strong commitment from the Chairman and Commissioners that at the end of this period the program will be protected. We do not often commit to “take whatever action is necessary” and the promise that we will even expand the base if needed is a major achievement. I will continue to fight to keep rural America connected.
- *Disabilities:* But we had to protect more than homeland security and universal service. We had to craft protections for Americans with disabilities. I know this much: The disabilities communities did not fight for so many years to obtain “functional equivalency” and equal access to technology only to have their hard-won victories stolen by some regulatory sleight of hand. So I fought to ensure that the item guarantees accessible technologies for the 54 million Americans with disabilities.
- *Competition:* We also take significant action to protect competition. We ensure access to facilities and interconnection so that small and medium businesses can continue to enjoy the lower prices and increased choices that competition brings.
- *Internet Openness:* And critically, for the first time ever, the Commission has adopted a policy statement with principles that will guide our effort to preserve and promote the openness that makes the Internet so great.

I am especially pleased at my colleagues’ adoption of this Statement of Policy on Internet openness. This is something I have been advocating for nearly two years. This Statement lays out a path forward under which the Commission will protect network neutrality so that the Internet remains a vibrant, open place where new technologies, business innovation and competition can flourish. We need a watchful eye to ensure that network providers do not become Internet gatekeepers, with the ability to dictate who can use the Internet and for what purpose. Consumers do not want to be told that they cannot use their DSL line for VoIP, for streaming video, to access a particular news website, or to play on a particular company’s game machine. While I would have preferred a rule that we could use to bring enforcement action, this is a critical step. And with violations of our policy, I will take the next step and push for Commission action. A line has been drawn in the sand. I am particularly appreciative of the
